PROFILE

I am an ambitious full-stack developer skilled in PHP, Laravel, Svelte, TypeScript, Docker, SQL and Python. I am young and eager to learn, looking for a chance to put all my theoretical knowledge into practice. I have completed several projects with scalable solutions, effectively leading them to achieve great results and satisfied clients. I am passionate about combining technology and leadership. I aim to contribute to innovative, forward-thinking teams while continually enhancing my expertise in software development, project management and data-driven solutions.

WORK EXPERIENCE

Social Media Manager   2024 – Present

Study Association 'Hello World'

- Managed promotional campaigns, leveraging creative strategies to increase student participation in events.
- Created visually appealing and informative content tailored to diverse audiences.

Group Leader & Software Developer   2024 – Present

Eco-Conscious Exchange Platform Development

- Led the development of an eco-conscious exchange platform, integrating frontend (Svelte, Tailwind CSS) and backend microservices.
- Facilitated Agile sprints, ensuring efficient collaboration and progress tracking.
- Designed and implemented features to enhance user engagement and app performance.

Freelance Web Developer   2023 - 2024

Security Company Website

- Designed and developed a professional and modern website for a security company, showcasing their comprehensive security services.
- Created an engaging and polished 'Data Protection' page with interactive transitions to enhance user experience.
- Collaborated closely with the client to ensure the website aligns with their vision and brand identity.
